## About this book

---

Autumn Glory 2014

Spring and Autumn are my favorite seasons for painting and photography. The weather is also just right, at least here in Japan when the temperature is not too hot and not too cold.

## Autumn Glory 2014

Spring and Autumn are my favorite seasons for painting and photography. The weather is also just right, at least here in Japan when the temperature is not too hot and not too cold.

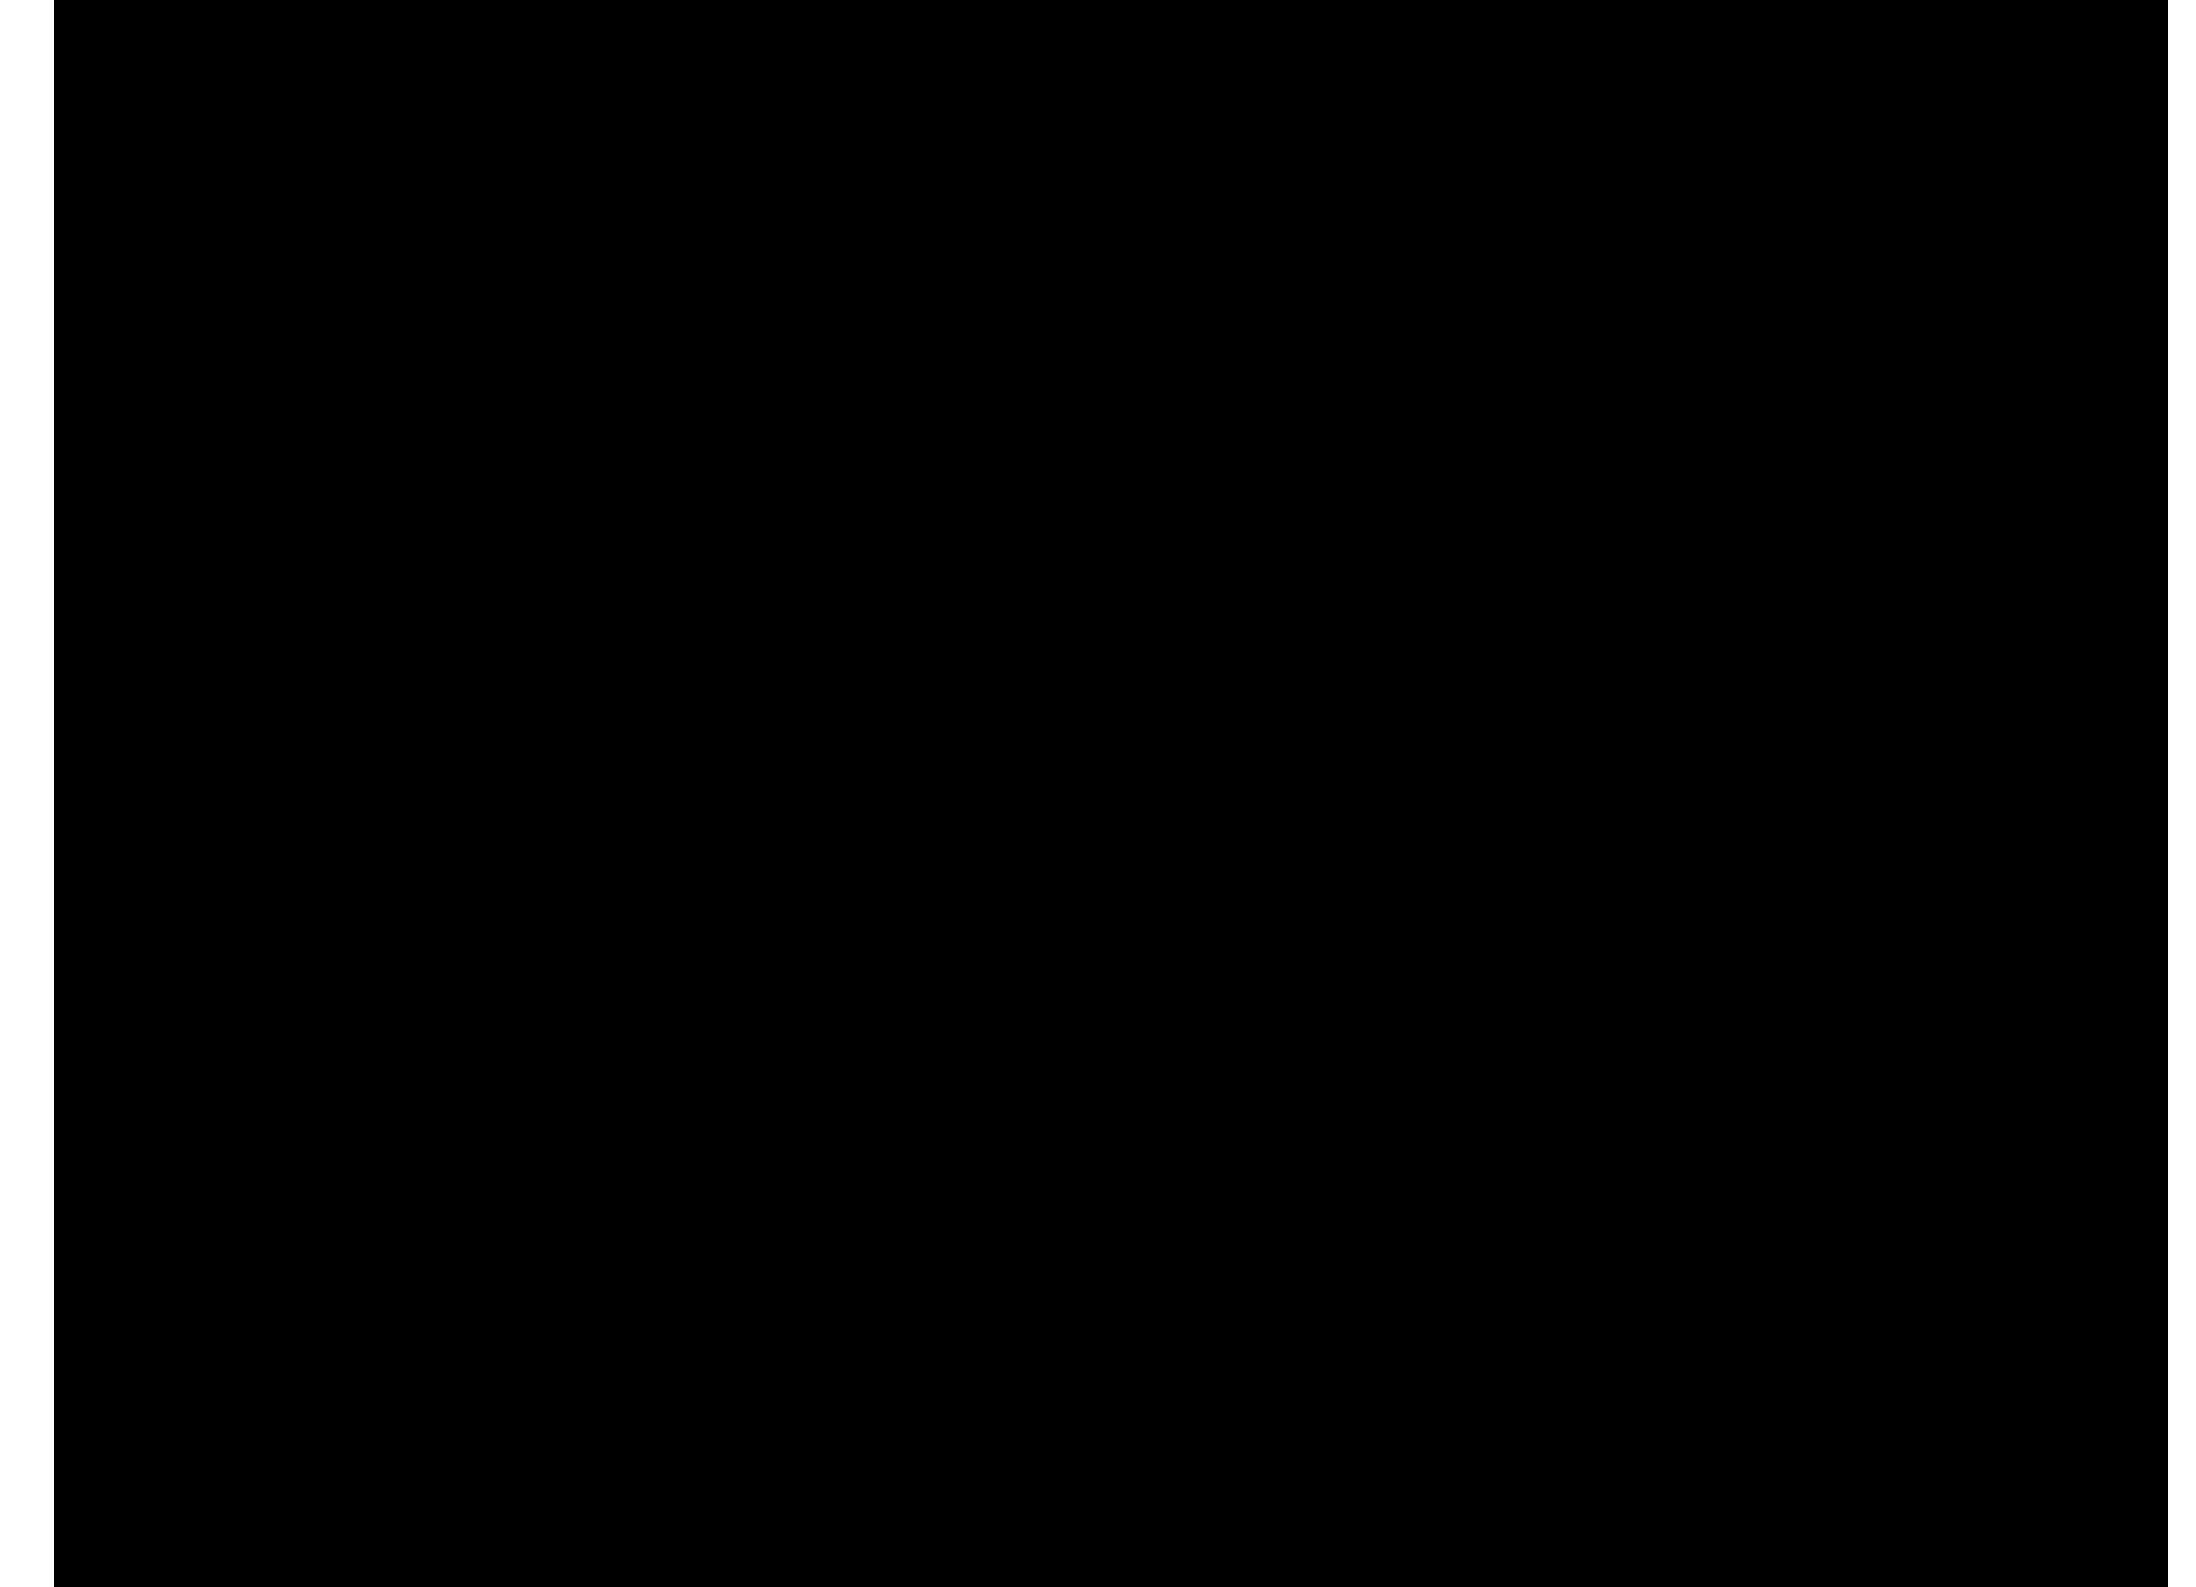

This year we visited the famous onsen town of Arima, in Kobe City, Hyogo Prefecture. We travelled by mountain cable, bus and ropeway across Mount Rokko to reach Arima. It was a National Holiday, so the the town was very crowded and although we had planned to have at least one good onsen, the waiting lines were all about 60 minutes waiting time, so we abandoned that to another day.

We have lived in Kobe City for about 12 years but this was our first visit to Arima. We will visit on another day to enjoy the hot volcanic waters of the onsens.

We also visited our own "Backyard" which is also part of the Rokko mountain range. We live at the foot of the mountains but can see the sea and reach the beach within 30 minutes.

This year, like many others, was a glorious year for the colors of autumn.
