## About this book

Historical Himeji Castle in the cherry blossom

# Himeji Castle, Hyogo Prefecture, Japan

Himeji Castle made a World Heritage site in 1993. It was spectacular with 100's of cherry blossom in full bloom. A great place for a photo shoot and it brought out some of the boyhood fantasies of samurai, ninja and maybe steamy love affairs.

The original castle dates from 1346 but most of the current structure is dated from 1618.
